

**(FORM H)**

**PRE-ACCREDITATION EXERCISE  
GUIDELINES OF THE MEDICAL  
REHABILITATION THERAPISTS  
(REGISTRATION) BOARD OF NIGERIA.**

## **INTRODUCTION**

In line with sections 11-14 of the enabling law (Decree 38 of 1988/M9 LFN 2004), the Board (MRTB), was established for the purpose of regulation and control of training and practice of Physiotherapy, Occupational Therapy, Speech Therapy, Audiology, Prosthetics & Orthotics, Chiropractic and Osteopathic Medicine Professions in Nigeria. The pre-accreditation visit is to ascertain feasibility of running the program which will be followed by the accreditation exercise to ensure the expected standards of learning is upheld.

## **AIMS OF PRE-ACCREDITATION VISIT**

1. To confirm location and site of University/Institution.
2. To assess and ascertain the feasibility of running the program in the University.
3. To inspect structural facilities on ground and ascertain adequacy for the program (classrooms, hostels etc).
4. To ascertain the availability of a Teaching Hospital.
5. To collect data for processing which includes number of staff employed and their designation, staff/ student ratio, licensure status of staff.
6. To approve a quota for admission and subsequent indexing.
7. To propose date for accreditation if all conditions are met.
8. To issue accreditation guidelines.

## **PRE-ACCREDITATION EXERCISE GUIDELINES FOR TRAINING INSTITUTIONS IN NIGERIA (PHYSIOTHERAPY).**

### **I. The Programme**

#### **a. Admissions**

All Training Institutions in Nigeria intending to run the Doctor of Physiotherapy (DPT) programme, shall be paid a ***pre-accreditation visit before admitting students*** by the Board (MRTB).

#### **b. Degree**

All Training Institutions running Doctor of Physiotherapy (DPT) programme shall operate a separate/autonomous department to be headed by a Professor or an Associate Professor/ Reader or a Senior Lecturer who is a Registered Physiotherapist and currently licensed in Nigeria.

At least 70% of its total lecturers shall possess PhD degree and no Lecturer shall aspire to be a senior lecturer without a PhD degree in Physiotherapy.

The head of department shall be assisted by other Registered Physiotherapists with current licenses as Lecturers and clinical instructors spread across the approved areas of specialization. The number of lecturers will be dependent on the student population.

#### **c. Areas of Specialization**

All training Institutions running Doctor of Physiotherapy programme shall be required to have eleven (11) distinct areas of specialization with at least five (5) specialists in each area spread across cadre viz; Professor, Associate professor (Reader), Senior Lecturers, Lecturers I, Lecturers II, Adjunct Lecturers and Clinical Instructors.

**Note** that two (2) adjunct lecturers and two clinical instructors are counted as one (1) lecturer.

### **II. Academic Matters**

#### **a. Curriculum**

A copy of the senate approved curriculum for the Doctor of Physiotherapy (DPT) training programme should include courses relevant to the minimum acceptable standard. The curriculum should also clearly spell out the ***programme Philosophy and Objectives, admission requirements, courses of the program, course contents and academic regulation*** including skills and competences expected to be acquired by an average graduate of the programme.

#### **i. Programme Philosophy and Objectives**

The philosophy and objectives of the programme must be clear and well stated in the curriculum and student handbook. It should be designed to train graduates and equip them with adequate theoretical knowledge, clinical skills, and sense of purpose; capable of providing excellent and evidence based professional physiotherapy services in any practice environment in line with global best practices.

#### **ii. Admission Requirements**

A minimum of five (5) credit passes in Physics, Chemistry, Biology, Mathematics and English Language at Senior Secondary Certificate Examination (SSCE) or General Certificate of Education (GCE 'O' level) or its equivalent is a requisite for admission in Physiotherapy programme.

The admission requirement into the Physiotherapy programme at all levels of training must be clearly stated in the curriculum and student handbook and in tune with standards of practice for physiotherapy training. Transfer and post-UTME students must all satisfy the 'O' level requirements.

### iii. Courses of the Programme

All Institutions must meet the required maximum entry point approved for the physiotherapy programme to accommodate the Lecturer/Student ratio of 1 to 10.

### iv. Academic Regulation

The conditions for progression from one level to the next level should be clearly stated in the handbook. Emphasis on failures and re-sit should be well captured including external examination.

The approaches to **course evaluation** (lecture schedules, course distributions, lecture notes, student's time table, continuous assessment, examination, availability of exam time table etc.), **practical, and research project** should be captured in the curriculum and student's handbook.

**An external examination system** shall be used for moderation during practical, clinical examination and project defence.

The Registrar or his representatives shall conduct a professional examination as may be prescribed by the Medical Rehabilitation Therapist Board.

## III. STAFFING

### a. Academic Staff

- i. The Head of Department must hold a PhD with first degree in Physiotherapy, and be registered Physiotherapist licensed with Medical Rehabilitation Registration Board of Nigeria, possessing current practicing license.
- ii. The Medical Rehabilitation Therapist Registration Board of Nigeria's approved Lecturer/Students' ratio for DPT degree is 1:10.
- iii. The Staff mix by rank should meet the minimum lectureship of 20:35:45 for professorial/senior lectureship/others respectively.
- iv. There must be a full complement of Lecturers with a minimum of Master's Degree in the different specialties of Physiotherapy as specified in the approved curriculum.

### b. Non-Academic Staff

- i. There must be a minimum of four (4) Physiotherapists in the four (4) Physiotherapy laboratories **as technical staff**.
- ii. There must be a full complement of administrative secretarial staff, cleaners, and securities for the department (a minimum of four (4) secretarial and administrative staff)

## IV. PHYSICAL FACILITIES

### a. Academic/ Administration offices

- i. A purpose built department with a conspicuous sign post in a clean and tidy environment within the teaching hospital should be provided.
- ii. Head of department's office must include with convenience and Secretarial unit attached to it.
- iii. Minimum of fifteen (15) other offices for academic staff
- iv. Departmental secretariat
- v. Departmental board room/ seminar room
- vi. Departmental convenience, i.e. male and female toilets/restrooms for academic staff, administrative staff and students.

#### **a. Lecture Halls/ Lecture Theatre/ Classrooms**

- i. Adequate numbers of well-ventilated and illuminated Classrooms with teaching facilities (projector, interactive board, public address system etc) each with a capacity of not less than fifty (50) students
- ii. Adequate Conveniences
- iii. Well-ventilated and illuminated Seminar Room equipped with teaching facilities

#### **c. Hostel Accommodation**

A well-furnished hostel accommodation with adequate water supply and electricity for the students should be provided both on campus for pre-clinical students and within the hospital for the clinical students.

#### **d. Basic Medical Laboratories**

- i. Well-ventilated and illuminated Gross Anatomy and embryology Laboratory fully equipped (see **appendix I** for list of equipment)
- ii. Well-ventilated and illuminated Histology laboratory fully equipped (see **appendix II** for the list of equipment).
- iii. Well-ventilated and illuminated Biochemistry Laboratory fully equipped (see **appendix III** for the list of equipment)
- iv. Well-ventilated and illuminated Physiology Laboratory fully equipped (see **appendix IV** for the list of equipment).

#### **e. Physiotherapy Demonstration Laboratory**

- i. Well-ventilated and illuminated **Exercise therapy/gymnasium**; the gymnasia should be separate Adult and Paediatric, with wooden /synthetic bouncing flooring structure and be fully equipped (see **appendix V** for the list of equipment).
- ii. Well-ventilated, illuminated and fully equipped **Electrotherapy room** fully equipped (see **appendix VI** for the list of equipment)
- iii. Well-ventilated, illuminated and fully equipped **Hydrotherapy room** fully equipped (see **appendix VII** for the list of equipment)
- iv. Well-ventilated, illuminated and fully equipped **Simulation room** fully equipped (see **appendix VIII** for the list of equipment)
- v. **Diagnostic equipment** (see **appendix IX** for the list of equipment)
- vi. **Infection control** consumables (see **appendix X** for the list of equipment)

Note: A licensed Physiotherapist **MUST** be employed to be in charge of the Practical Demonstration laboratories. However, two (2) changing rooms and conveniences should be attached to the demonstration rooms.

#### **f. Library**

A central library and Faculty/department library must be provided with adequate and current (not older than 10-12years) holdings for books and journals, periodicals and bibliographic indices relevant to Physiotherapy training across all areas of specializations.

An E-library with subscription of databases and sufficient offline materials relevant to Physiotherapy training should be provided. An Internet facility with strong connectivity and reasonable bandwidth coverage should also be made available.

### **g. Transportation**

In addition to other university shared transportation, the department should have a bus for the purpose of outside and community posting and a departmental utility vehicle.

### **h. Safety Measures**

Fire extinguisher, sand buckets and other necessary safety tools should be mounted in all the strategic locations in the facility such as classrooms, offices, hostels, etc. There **MUST** be a muster point specified with a clear signage and direction. In addition, there must be exit doors in all the facilities. Ramps and rails should be provided for physically challenged to ease accessibility and prevent fall (see **appendix xiii** for the list of equipment).

## **V. Clinical Training**

### **a. Teaching Hospital**

This **MUST** be a tertiary health facility with a level of health care obtained from specialists in a large hospital after referral from primary and secondary care providers. It must be a facility with minimum of two hundred and fifty (250) beds and with a full complement of services, including pediatrics, obstetrics, general medicine with neurology unit, gynecology, various branches of surgery with orthopedic unit, anesthesia with ICU, and psychiatry, or a specialty hospital dedicated to specific sub-specialty care (pediatric centers, oncology centers, psychiatric). There **MUST** be a purpose-built Physiotherapy department with well-furnished offices, treatment areas, call duty rooms, student changing areas, seminar room, departmental library etc. The Physiotherapy department in said hospital should have a minimum of forty (40) registered physiotherapists providing physiotherapy services across various specialties viz;

- i. Paediatrics (see **appendix XI** for the list of equipment),
- ii. Neurology (see **appendix XII** for the list of equipment),
- iii. Orthopaedics and Musculoskeletal (see **appendix XIII** for the list of equipment),
- iv. Pelvic and Women's Health Physiotherapy Unit (see **appendix XIV** for the list of equipment),
- v. Cardiopulmonary (see **appendix XV** for the list of equipment),
- vi. Geriatrics (see **appendix XVI** for the list of the equipment),
- vii. Community (see **appendix XVII** for the list of equipment),
- viii. Palliative care (see **appendix XVIII** for the list of equipment),
- ix. Mental Health (see **appendix XIX** for the list of equipment), and
- x. Ergonomics/Occupational Health (see **appendix XX** for the list of equipment).
- xi. Sports and Recreational physiotherapy (see **appendix XXI** for the list of equipment).

Each specialty in the physiotherapy department should have the following equipment indicated in **appendix XI - XXI**.

### **b. Physiotherapy Department/Faculty**

The Physiotherapy academic department should be situated within the teaching hospital.

### **c. Student Hostel:**

All students at the clinical level **MUST** be accommodated within the teaching hospitals.

**Note:** In case of a university that does not have a teaching hospital, evidence of an MOU with an existing teaching hospital must be provided. The department of Physiotherapy to be used for

the training **MUST** be accredited for both safety and training. Each specialty in the physiotherapy department should have the following equipment in the various units as indicated in **appendixes XI - XIX**.

### 6.1 Funding:

A source of departmental funding **MUST** be clearly stated for the day to day running of the department, routine maintenance and consumable for the demonstration/ laboratories. A breakdown of the projected budget for the next five years **MUST** be provided.

### Expected equipment and the required quantity

#### Appendix I: Anatomy and Embryology

This should contain body storage tank, preparation room, embalming room, museum, dissection room for 8-10 students per cadaver, tutorial room, general store, staff offices, and an adequate running water supply. There should also be:

| S/N | Items                                                         | Quantity                        |
|-----|---------------------------------------------------------------|---------------------------------|
| 1   | Embalmed bodies                                               | 1 cadaver per set of 6 students |
| 2   | Anatomage Table                                               | 1                               |
| 3   | Equipment Trolleys                                            | 3                               |
| 4   | Electric Embalming Machine                                    | 1                               |
| 5   | Bone Cutting Equipment - Electric saw/drill                   | 2                               |
| 6   | Articulated and unarticulated skeletons                       | 5                               |
| 7   | X-ray Viewing Boxes                                           | 3                               |
| 8   | Air-conditioners for the Dissecting Rooms and Air Extractors. | 4                               |
| 9   | Models                                                        | 5                               |
| 10  | Slide for Sections                                            | Many                            |
| 11  | Slide Projectors                                              | 3                               |
| 12  | Toilet Facilities                                             | Gender sensitive                |
| 13  | Changing Rooms                                                | 2                               |
| 14  | Shower Room etc.                                              | 1                               |

#### Appendix II: Histology

There should be an air-conditioned store where consumables are kept, offices, preparatory room, teaching laboratory for student with teaching aids, microscope store or under bench cupboards. wash up room with adequate running water supply, work benches with zinc or Formica shelves for glass ware, burners etc. Other items as listed below;

| S/N | Items                            | Quantity         |
|-----|----------------------------------|------------------|
| 1   | Microtome                        | 2                |
| 2   | Rotary/Sledge Microtome Knives   | 3                |
| 3   | Light Microscopes Microtome      | 1 per 2 students |
| 4   | Vacuum Pump Dissecting Microtome | 3                |
| 5   | Cryostat with Microtome          | 3                |

|   |                     |                  |
|---|---------------------|------------------|
| 6 | Teaching Microscope | 3                |
| 7 | Electron Microscope | 1 per 2 students |
| 8 | Slides              | Many             |

### APPENDIX III- Biochemistry

There should be an air-conditioned store where consumable materials are kept, technician offices, a preparatory room, teaching laboratory for students with adequate running water supply, a shower area. There should also be:

| S/N | Items                     | Quantity          |
|-----|---------------------------|-------------------|
| 1   | Centrifuge                | 6                 |
| 2   | Ultracentrifuge           | 2                 |
| 3   | Electronic Balances       | 2                 |
| 4   | Heating Block             | 8                 |
| 5   | Vacuum Pumps              | 2                 |
| 6   | Spectrophotometer         | 1 per 10 students |
| 7   | PH. Metres                | 1 per 5 students  |
| 8   | Thermostatic Water Bath   | 1                 |
| 9   | Burner                    | 3 per bench       |
| 10  | Test Tube (varying sizes) | Many              |
| 11  | Distiller                 | 3                 |

### Appendix IV Physiology

The Physiology department should have an animal house where experimental animals are kept. The laboratory should have an air-conditioned store, a preparatory room, wash room with adequate running water supply, laboratory staff offices. Other equipment are listed below;

| S/N | Items                             | Quantity         |
|-----|-----------------------------------|------------------|
| 1.  | Spirometer                        | 1 per 5 students |
| 2.  | Vitalograph                       | 1 per 5 students |
| 3.  | Polygraph                         | 1                |
| 4.  | Peak Flow Metre                   | 1 per 5 students |
| 5.  | Gas Metre                         | 2                |
| 6.  | ECG Machine                       | 4                |
| 7.  | Spectrophotometers                | 1 per 5 students |
| 8.  | Physiograph Recorder Transducers  | 1 per 5 students |
| 9.  | Oscilloscopes                     | 4                |
| 10. | Centrifuges                       | 6                |
| 11. | Blood Gas Callipers               | 2                |
| 12. | Audiometer                        | 2                |
| 13. | Water Baths                       | 2                |
| 14. | Electronic Weighing Balance Scale | 2                |
| 15. | Flame Photometer                  | 4                |
| 16. | Microcentrifuge                   | 2                |
| 17. | Water Distiller                   | 5                |
| 18. | Bicycle Ergometer                 | 3                |

|     |                                 |                  |
|-----|---------------------------------|------------------|
| 19. | Stethoscopes/ Sphygmomanometres | 12               |
| 20. | Electron Microscope             | 1 per 2 students |
| 21. | Teaching Microscope             | 3                |
| 22. | Slides                          | Many             |
| 23. | Snelle's Chart                  | 5                |

#### **APPENDIX V: EXERCISE THERAPY/ GYMNASIUM EQUIPMENT**

An adult gymnasium that is echo proof with wooden or synthetic bouncing floor structure, about 25 square metres wide 5 to 7 metres high. Equipment for gymnasium are as follows;

| <b>S/N</b> | <b>Items</b>                                    | <b>Quantity</b>              |
|------------|-------------------------------------------------|------------------------------|
| 1.         | Multi Gym                                       | 2 minimum                    |
| 2.         | Treadmill                                       | 5                            |
| 3.         | Bicycle Ergometer                               | 5                            |
| 4.         | Elliptical Bicycle Ergometer                    | 2                            |
| 5.         | Recumbent Bicycle Ergometer                     | 2                            |
| 6.         | Hand Exerciser                                  | 5                            |
| 7.         | Shoulder Wheel                                  | 2                            |
| 8.         | Shoulder Ladder                                 | 2                            |
| 9.         | Quadriceps Drill/Bench                          | 1                            |
| 10.        | Traction Units (cervical/lumbar)                | 1 each                       |
| 11.        | Medicine Ball (5 varying weights)               | 1 each                       |
| 12.        | Exercise Ball                                   | 5                            |
| 13.        | Reciprocal Pulley                               | 2                            |
| 14.        | Steppers                                        | 2                            |
| 15.        | Wooden Staircase (firm/shakeable)               | 2                            |
| 16.        | Wobble Board                                    | 5                            |
| 17.        | Parallel Bar                                    | 1                            |
| 18.        | Standing Mirror                                 | 3                            |
| 19.        | Exercise Mat                                    | 5                            |
| 20.        | Sitting Box                                     | 5                            |
| 21.        | Standing Box                                    | 4                            |
| 22.        | TheraBands (yellow, Green, Blue, Red)           | 10 each of different colours |
| 23.        | Handgrip Exerciser                              | 5                            |
| 24.        | Dumbbells of different (1, 2, 3, 4, 5kgs) sizes | 5 each                       |
| 25.        | Sand Bags of different sizes (1, 2, 3, 4, 5kgs) | 5 each                       |
| 26.        | Walking Frames                                  | 10                           |
| 27.        | Suspension Therapy Unit                         | 1                            |
| 28.        | Crutches (Elbow and Axillary)                   | 10                           |
| 29.        | Wheel Chairs                                    | 5                            |
| 30.        | Weighing Scale                                  | 5                            |
| 31.        | Stadiometer                                     | 5                            |
| 32.        | Pulse Oximeter                                  | 5                            |
| 33.        | Tape Measure                                    | 10                           |

|     |                                    |    |
|-----|------------------------------------|----|
| 34. | Sphygmomanometer                   | 10 |
| 35. | Stethoscope                        | 10 |
| 36. | Walking Sticks, Quadraped & Tripod | 10 |
| 37. | Precision Box                      | 3  |
| 38. | X-ray Viewing Box                  | 4  |
| 39. | Exercise Couch                     | 5  |
| 40. | Makintosh                          |    |
| 41. | Pillows                            |    |
| 42. | Bedsheet                           |    |
| 43. | Finger Ladder                      | 2  |

#### **APPENDIX VI: Electrotherapy Demonstration Room**

The electrotherapy demonstration area should be about 15 to 18 metres by 7 to 10 metres with even non-slippery flooring, screened out to accommodate an Equipment trolley, a Plinth and a stool each. The screened area should have a well-insulated electrical outlet. The equipment are listed below;

| S/N | Items                  | Quantity |
|-----|------------------------|----------|
| 1   | TENS Machine           | 4        |
| 2   | EMS Machine            | 3        |
| 3   | IRR Luminous           | 4        |
| 4   | IRR Non-luminous       | 2        |
| 5   | Shortwave Diathermy    | 2        |
| 6   | Wax Bath               | 4        |
| 7   | UVR                    | 5        |
| 8   | IF Therapy             | 3        |
| 9   | Shock Wave             | 2        |
| 10  | Micro Wave             | 2        |
| 11  | Ice Making Machine     | 3        |
| 12  | Therapeutic Ultrasound | 3        |
| 13  | Laser or Light Therapy | 3        |
| 14  | Hydrocollator Unit     | 2        |
| 15  | Pneumatic Machine      | 2        |

#### **APPENDIX VII: HYDROTHERAPY ROOM**

| S/N | Name of Equipment          | Total Number Required |
|-----|----------------------------|-----------------------|
| 1.  | Standard Hydrotherapy Pool | 1                     |
| 2.  | Aquatic Ergometer          | 1                     |
| 3.  | Aquatic Treadmill          | 1                     |
| 4.  | Life Jacket                | 4                     |

### APPENDIX VIII: Simulation Laboratory

| S/N | Name of Equipment                     | Quantity                                                                                |
|-----|---------------------------------------|-----------------------------------------------------------------------------------------|
| 1.  | High Impedance Mannequin              | One high impedance mannequin                                                            |
| 2.  | Mannequins and Beds in the Laboratory | 10 of manual mannequins and 10 beds, the laboratory should be constructed like cubicles |

### Appendix IX: Diagnostic Equipment

| S/N | Name of Equipment                                | Total Number Required |
|-----|--------------------------------------------------|-----------------------|
| 1.  | Goniometers                                      | 4                     |
| 2.  | Sphygmomanometer / Stethoscope                   | 4                     |
| 3.  | Spirometers                                      | 4                     |
| 4.  | Peak Flow Meters                                 | 4                     |
| 5.  | Skin Fold Callipers                              | 4                     |
| 6.  | One Stop Watch                                   | 4                     |
| 7.  | Hand Grip Dynamometer /Digital Dynamo            | 5                     |
| 8.  | Scale Weight (wheelchair accessible)             | 3                     |
| 9.  | Pain Rating Scale                                | 4                     |
| 10. | X-ray Viewing Box`                               | 4                     |
| 11. | Sensory Processing Test Equipment                | 2                     |
| 12. | Heart Rate Monitor                               | 5                     |
| 13. | Measuring Tape                                   | 10                    |
| 14. | Cognitive Test Equipment                         | 5                     |
| 15. | Stadiometer                                      | 1                     |
| 16. | EMG                                              | 1                     |
| 17. | Body Mass Index Calculator                       | 5                     |
| 18. | Pulse Oximeter                                   | 5                     |
| 19. | Reflex Hammer                                    | 5                     |
| 20. | Tongue Depressor                                 | Packs                 |
| 21. | Tuning Fork (128Hz)                              | 5                     |
| 22. | Two Test Tubes                                   | 5                     |
| 23. | Familiar Objects (e.g. paper clip, coin, marble) | 4                     |
| 24. | Pen Light                                        | 5                     |
| 25. | Thermometer                                      | 5                     |
| 26. | Cotton Ball or Cotton Tipped Swab                | PACK                  |
| 27. | Periniometer                                     | 4                     |

## APPENDIX X: Infection Control

| S/N | Name of Equipment   | Total Number Required |
|-----|---------------------|-----------------------|
| 1.  | Face Masks          | Packs                 |
| 2.  | Disposable Gloves   | Packs                 |
| 3.  | Sputum Containers   | Packs                 |
| 4.  | Sterilizing Unit    | 1                     |
| 5.  | Autoclave           | 1                     |
| 6.  | Antiseptic Solution | packs                 |
| 7.  | Washing Machine     | 1                     |
| 8.  | Drying Machine      | 1                     |

## APPENDIX XI: PEDIATRIC UNIT

A paediatric gymnasium that is echo proof with wooden or synthetic bouncing floor structure about 25m<sup>2</sup> wide, and 5-7m height. In addition, the equipment as listed below:

| S/N | Name of Equipment                    | Quantity              |
|-----|--------------------------------------|-----------------------|
| 1   | Gait Trainers                        | 3                     |
| 2   | Precision Boxes                      | 3                     |
| 3   | Precision Toys                       | 10                    |
| 4   | Giant Mirrors                        | Wall to wall          |
| 5   | Prone Standers                       | 4                     |
| 6   | Standing Frames                      | 5                     |
| 7   | Treatment Plinths                    | 4                     |
| 8   | Therapy Balls/Medicine Balls         | 5                     |
| 9   | Posterior Walkers                    | 4                     |
| 10  | Wedges and Rolls                     | 5 each                |
| 11  | Frenkel Mats                         | 5                     |
| 12  | Paediatric Treadmill                 | 3                     |
| 13  | Resistance Bands                     | 10 (different colors) |
| 14  | Paediatric Crutches                  | 5                     |
| 15  | Paediatric Tilt Bed                  | 2                     |
| 16  | Supportive Garment                   | 3                     |
| 17  | Stabilization Belts                  | 3                     |
| 18  | Everyday Objects for ADL             | 10                    |
| 19  | Exercise Mats                        | 5                     |
| 20  | Adapted Eating and Drinking Products | 5                     |

## APPENDIX XII: NEUROLOGY PHYSIOTHERAPY UNIT

| S/N | Name of Equipment  | Total Number Required |
|-----|--------------------|-----------------------|
| 1.  | Suctioning Machine | 2                     |
| 2.  | Tilt Bed           | 2                     |

|    |                                                        |         |
|----|--------------------------------------------------------|---------|
| 3. | Theraband – Resistance Band (Yellow, Green, Blue, Red) | 10 each |
| 4. | Neuro-com Balance Master                               | 3       |
| 5. | Wheelchair – Motorised                                 | 2       |
| 6. | Walking Sticks                                         | 3       |
| 7. | 3 by 4 Wheeled Walker                                  | 3       |
| 8. | Precision Box                                          | 3       |
| 9. | Gait Belts                                             | 3       |
| 10 | Pulse Oximeter                                         | 3       |
| 11 | Wall Bar                                               | 2       |
| 12 | Standing Infra-red Lamp (luminous/non-luminous)        | 3       |
| 13 | Metronome                                              | 5       |
| 14 | Spit Basin                                             | 8       |
| 15 | Flashlight                                             | 10      |
| 16 | Cognitive Test Equipment (PD & dementia)               | 10      |
| 17 | Transfer Boards/Slide Sheet                            | 8       |
| 18 | Pillows                                                | 10      |
| 19 | Foam Rollers/Wedges                                    | 10 each |
| 20 | Splinting Kit (static/dynamic)                         | 5 each  |
| 21 | Orthoses Kit                                           | 5       |
| 22 | Casting Kit                                            | 5       |
| 23 | Rollator                                               | 5       |
| 24 | Equipment for Sport and Recreational Activities        | 10      |
| 25 | Upper Limb Supports                                    | 5       |
| 26 | Upper Limb Workstation                                 | 5       |
| 27 | Arm Activity Kit                                       | 5       |
| 28 | Cycle Ergometer (arm or leg)                           | 4       |
| 29 | Stools/Small Benches of varying Height                 | 5 each  |
| 30 | Ramps (temporary/mobile)                               | 5 each  |
| 31 | Training Stairs                                        | 2       |
| 32 | Parallel Bar                                           | 2       |
| 33 | Steps (stackable)                                      | 2       |
| 34 | Balance Board/Cushion                                  | 3       |
| 35 | Resistive Exercise Putty                               | 5       |
| 36 | Exercise or Gym Balls                                  | 5       |
| 37 | TENS Supply Kit                                        | 4       |
| 38 | Treatment Tables                                       | 5       |
| 39 | (Functional) Electrical Stimulation Kit                | 2       |
| 40 | Assistant Support Belt                                 | 3       |
| 41 | Transfer Boards/Slide Sheet                            | 4       |
| 42 | Weighing Scale & Measuring Tape                        | 2       |
| 43 | Heart Rate Monitor                                     | 4       |
| 44 | Cycle Ergometer (Arm & Leg)                            | 2       |

| 28. | Foam Wedge                                                             | 5       |
| 29. | Biofeedback Machine                                                    | 2       |
| 30. | Vibrators (Patient acquired-personalized)                              | 2       |
| 31. | Pelvic Wand                                                            | 4       |
| 32. | Kegel Balls                                                            | 5       |
| 33. | Dilators (Patient acquired-personalized)                               | -       |
| 34. | Surface Electrodes                                                     | 10      |
| 35. | Lubricating Gel                                                        | 5 packs |
| 36. | Vaginal balls for Kegel exercises                                      | 6       |

#### APPENDIX XV: CARDIO-PULMONARY PHYSIOTHERAPY UNIT

| S/N | Name of Equipment                                                    | Total Number Required |
|-----|----------------------------------------------------------------------|-----------------------|
| 1.  | Modern Mechanical Vibrators                                          | 2                     |
| 2.  | ECG Cycle Ergometers                                                 | 2                     |
| 3.  | ECG Treadmills                                                       | 2                     |
| 4.  | ECG Device                                                           | 3                     |
| 5.  | Dynamometers                                                         | 2                     |
| 6.  | High Frequency Chest Wall Oscillation (HFCWO) Device                 | 2                     |
| 7.  | High Frequency Chest Compression Machine                             | 2                     |
| 8.  | Nimbus Series Bed at least 1                                         | 1                     |
| 9.  | Positive Expiratory Pressure (PEP) Mask with Manometer               | 2                     |
| 10. | Electro Flo 5000 Airway Clearance Device                             | 2                     |
| 11. | Chest Vibrator                                                       | 2                     |
| 12. | Children CompAir Lightweight Compressor Respiratory Nebulizer Inhale | 2                     |
| 13. | Lumbar Vibratory Massage Pillow                                      | 4                     |
| 14. | Apex Exercise Pulley Set                                             | 4                     |
| 15. | Handycare Rollator                                                   | 5                     |
| 16. | Mini Electric Exercise Bike                                          | 2                     |
| 17. | Mobile Frame Gait Walker                                             | 3                     |
| 18. | Fourier Intelligence Robot                                           | 2                     |
| 19. | Exercise Stair & Steps                                               | 2 each                |
| 20. | Electronic Nebulizers                                                | 2                     |
| 21. | Peak Flow Meter                                                      | 4                     |
| 22. | Respiratory Exerciser                                                | 4                     |
| 23. | Pulse Oximeter                                                       | 4                     |
| 24. | Ambu Bag                                                             | 4                     |
| 25. | Suctioning Machine                                                   | 2                     |
| 26. | Heart Monitor                                                        | 4                     |
| 27. | ECG Machine                                                          | 2                     |
| 28. | Non-invasive ventilators                                             | 2                     |
| 29. | Spirometers                                                          | 5                     |
| 30. | In-sufflators                                                        | 2                     |

|     |               |   |
|-----|---------------|---|
| 31. | Ex-sufflators | 2 |
|-----|---------------|---|

#### APPENDIX XVI: GERIATRIC PHYSIOTHERAPY UNIT

| S/N | Name of Equipment                          | Total Number Required |
|-----|--------------------------------------------|-----------------------|
| 1.  | Electrical Muscle Stimulators              | 2                     |
| 2.  | Stethoscope                                | 5                     |
| 3.  | Sphygmomanometer                           | 5                     |
| 4.  | Exercise Mats                              | 5                     |
| 5.  | Reciprocal Pulley                          | 4                     |
| 6.  | TheraBand (yellow, red, blue, black)       | 2 each                |
| 7.  | Therapeutic Ultrasound Machine             | 4                     |
| 8.  | Sand Bag 3kg, 2kg, 1kg                     | 2 each                |
| 9.  | Transcutaneous Electrical Nerve Stimulator | 5                     |
| 10. | Plinths                                    | 5                     |
| 11. | Bicycle Ergometer                          | 4                     |
| 12. | Shortwave Diathermy                        | 2                     |
| 13. | Wall Bars                                  | 4                     |
| 14. | Finger Ladder                              | 4                     |
| 15. | Shoulder Wheel                             | 4                     |
| 16. | Standing Mirror                            | 4                     |
| 17. | Hand Function Board                        | 4                     |
| 18. | Hand Balls/Hand Exercisers                 | 5                     |
| 19. | Wooden Stair Case                          | 4                     |
| 20. | Wobble Board                               | 5                     |
| 21. | Gait Belts                                 | 4                     |
| 22. | Steppers                                   | 10                    |
| 23. | Parallel Bars                              | 2                     |
| 24. | Standing Infrared Machine                  | 1 each                |

#### APPENDIX XVII: COMMUNITY-BASED PHYSIOTHERAPY

| S/N | Name of Equipment                                                                             | Total Number Required |
|-----|-----------------------------------------------------------------------------------------------|-----------------------|
| 1.  | Portable Ultrasonic Therapy Machine                                                           | 2                     |
| 2.  | TENS/EMS                                                                                      | 2 each                |
| 3.  | Infra-Red Lamps                                                                               | 3                     |
| 4.  | Freezer (small size) for Ice making                                                           | 1                     |
| 5.  | Parallel Bar                                                                                  | 1                     |
| 6.  | Walking Aids (axillary crutches, elbow crutches, walking frame, tetrapod stick, tripod stick) | 5 each                |
| 7.  | Exercise Mats                                                                                 | 5                     |
| 8.  | Weights/Sand bags                                                                             | 5 each                |
| 9.  | Lumbar and Cervical Traction Kits                                                             | 1 each                |

|     |                        |    |
|-----|------------------------|----|
| 10. | Wooden Staircase       | 1  |
| 11. | Hand Exercisers        | 4  |
| 12. | Wobble Boards          | 4  |
| 13. | Wall Bar               | 1  |
| 14. | Pulse Oximeter         | 4  |
| 15. | Stethoscope            | 2  |
| 16. | Sphygmomanometer       | 2  |
| 17. | Shoulder Wheel         | 2  |
| 18. | Bandages               | 10 |
| 19. | Pulse Oximeter         | 2  |
| 20. | Gait Belts             | 2  |
| 21. | Frenkel Mats           | 2  |
| 22. | Plinths                | 2  |
| 23. | Giant Standing Mirrors | 1  |

#### **APPENDIX XVIII: PALLIATIVE CARE PHYSIOTHERAPY UNIT**

| <b>S/N</b> | <b>Name of Equipment</b>                        | <b>Total Number Required</b> |
|------------|-------------------------------------------------|------------------------------|
| 1.         | TENS                                            | 5                            |
| 2.         | Hot and Cold Packs                              | 3 each                       |
| 3.         | Foam Wedges                                     | 5                            |
| 4.         | Foam Rollers                                    | 5                            |
| 5.         | Utensils for Activities of Daily Living         | Many                         |
| 6.         | Balance Board/Cushion                           | 2                            |
| 7.         | Resistance Bands                                | 5 each                       |
| 8.         | Weights                                         | 3 each                       |
| 9.         | Exercise Ball                                   | 5                            |
| 10.        | Assistive Products for Dressing                 | 3                            |
| 11.        | Assistive Products for Toileting                | 3                            |
| 12.        | Adapted Eating and Drinking Products            | 3                            |
| 13.        | Equipment for Sport and Recreational Activities |                              |
| 14.        | Steppers                                        | 3                            |

#### **APPENDIX XIX: MENTAL HEALTH PHYSIOTHERAPY UNIT**

| <b>S/N</b> | <b>Name of Equipment</b>                | <b>Total Number Required</b> |
|------------|-----------------------------------------|------------------------------|
| 1.         | Balance Board/Cushion                   | 3                            |
| 2.         | Cycle Ergometer (arm or leg)            | 2                            |
| 3.         | Resistance Bands                        | 3 each                       |
| 4.         | Utensils for Activities of Daily Living | 3                            |
| 5.         | Video Recording Devices                 |                              |
| 6.         | Dumbbells of Varying Sizes              | 3 each                       |
| 7.         | Giant Mirror                            | 2                            |

**APPENDIX XX: ERGONOMICS AND OCCUPATIONAL HEALTH PHYSIOTHERAPY**  
**UNIT**

| S/N | Name of equipment                   | Total Number Required |
|-----|-------------------------------------|-----------------------|
| 1.  | Portable Ultrasonic Therapy Machine | 2                     |
| 2.  | TENS/EMS                            | 2 each                |
| 3.  | Standing Infra-Red Lamps            | 3                     |
| 4.  | Freezer (small size) for Ice making | 1                     |
| 5.  | Parallel Bar                        | 1                     |
| 6.  | Walking Aids (crutches)             | 5 each                |
| 7.  | Exercise Mats                       | 5                     |
| 8.  | Weights/Sand Bags                   | 3 each                |
| 9.  | Cervical Traction Machine           | 1 each                |
| 10. | Wooden Staircase                    | 1                     |
| 11. | Hand Exercisers                     | 4                     |
| 12. | Wobble Boards                       | 4                     |
| 13. | Wall Bar                            | 1                     |
| 14. | Pulse Oximeter                      | 4                     |
| 15. | Stethoscope                         | 2                     |
| 16. | Sphygmomanometer                    | 2                     |
| 17. | Shoulder Wheel                      | 2                     |
| 18. | Bandages                            | 10                    |
| 19. | Gait Belts                          | 2                     |

**APPENDIX XXI: SPORTS AND RECREATIONAL PHYSIOTHERAPY**

| S/N | Name of Equipment            | Total Number Required |
|-----|------------------------------|-----------------------|
| 1.  | Goniometer                   |                       |
| 2.  | Measuring Tape               |                       |
| 3.  | Hand Dynamometer             |                       |
| 4.  | Reflex Hammer/Patella Hammer |                       |
| 5.  | Resistance Bands             |                       |
| 6.  | Dumbbells                    |                       |
| 7.  | TENS                         |                       |
| 8.  | Therapeutic Ultrasound       |                       |
| 9.  | Ice Packs//Cryotherapy Cuffs |                       |

|     |                |  |
|-----|----------------|--|
| 10. | Treadmill      |  |
| 11. | Braces/Splints |  |
| 12. | Kinesiotapes   |  |

#### APPENDIX XXII: SAFETY MEASURES

| S/N | Name of Equipment                        | Total Number Required                   |
|-----|------------------------------------------|-----------------------------------------|
| 1.  | Alarm                                    | Should be Placed in strategic locations |
| 2.  | Fire Extinguisher                        | Should be Placed in strategic locations |
| 3.  | Blanket                                  | Should be Placed in strategic locations |
| 4.  | Intercom                                 | Should be Placed in strategic locations |
| 5.  | Fire Assembly Point                      | Should be Placed in strategic locations |
| 6.  | Sand Bucket                              | Should be Placed in strategic locations |
| 7.  | Clearly marked direction to muster point |                                         |
